Career Objective

Motivated and detail-oriented aspiring software engineer with a solid academic background and hands-on experience through educational and training projects. Eager to join a growth-oriented organization where I can contribute to building robust software solutions and grow into a proficient developer.

Technical Skills

- **Programming language:** JavaScript (ES6).
- **Web Technologies**: HTML, CSS, Bootstrap, JavaScript, ReactJS.
- **Backend Technologies**: Node.js, Express.js.
- **Databases:** MySQL, MongoDB.
- **Tools:** Postman**,** Git & GitHub, VS Code.

Academic Details

Bachelor of Technology (B-Tech) – Computer Science & Engineering
RGPV University, JNCT College of Technology, Rewa, Madhya Pradesh
2021 – 2025 | CGPA: 7.8/10

Certification

Mern Stack
Institution: Infoviaan Technologies, Indore
Duration: July 2025 – Present

Projects

CRUD Application (Product Management System):

Technologies: React.js, React-Redux, React-Bootstrap, CSS, JSON

Description: Developed a CRUD-based web application using React.js with React-Redux for state management. Implemented Create, Read, Update, and Delete (CRUD) operations on JSON-based data used as a mock database. Designed responsive and reusable UI components using React-Bootstrap and CSS. Ensured smooth data flow and state updates across components using Redux.

E-commerce Website:

Technologies: React.js, CSS, React-Bootstrap, Material UI, React-Redux, JSON

Description: Developed a responsive e-commerce web application using React.js and React-Redux for state management. Product data was managed using JSON files as a data source, which were integrated into the application for displaying product listings and details. Users can browse products, view product information, add items to the cart, and manage cart quantities. Designed a modern and responsive UI using React-Bootstrap and Material UI. Implemented component-based architecture and centralized state management for smooth data flow across the application.

CSS Generator Tools:

Technologies: HTML, CSS, JavaScript, Bootstrap.

Description: Built a web tool that dynamically generates custom CSS code based on user-selected styles such as colors, borders, gradients, and shadows. Enables live preview and easy copy functionality.

Interests

- Knowing more about Core Computer Science Subjects.
- Solving general problem statements of JavaScript and hence analysing them. Due to this, I try to improve my logical thinking capacity.

Declaration: I hereby declare that all the information I provided is correct to the best of my knowledge.
